WHY ARE OUR NEW BATTERIES BETTER?

- All OTR Group 31 batteries are now anchor bonded
- PowerFrame® grid technology
- Impact resistant, reinforced, extended durability case

AGM 31

- Certified *non-spillable* design provides the safest solution
- Extended life — long-lasting performance even under demanding applications
- Designed for repetitive cycling — ability to recharge quickly after powering vehicle electronics
- Reserve capacity — 200
- No restriction on transportation and mounting flexibility in the vehicle (non-hazmat)

ECL Battery

- Increased cycling capacity and quicker recharging
- Glass mat separator for extended battery life

OTR 31

- Maintenance-free technology — stamped PowerFrame positive alloy grid provides longer life
- Specially designed lead alloy strap and anchor bonding provide increased stability for high-vibration
- Impact resistant polypropylene case with reinforced endwall design
- Anchor bonding — locks grid elements in place for improved vibration resistance

HEAVY-DUTY

QUALITY • INNOVATION • DURABILITY
